

NEW EUROPE 100 2016

Res Publica together with Google and the Visegrad Fund in cooperation with Financial Times and dozen of institutions from the region is presenting the New Europe 100 project - a list of outstanding challengers from Central and Eastern Europe.

The New Europe 100 list is about individuals from the region who are changing the world and improving people's lives with ideas that scale up in the digital world. It's about those who, with their courage for innovation, new-tech expertise, unique skills, and social outreach, are having a global impact. This list is both about people and their big ideas. We will seek and bring together personalities whose actions drive them and us to a better future.
